S7335-801

south dakota facts:

An Abstract of Statistics and Graphics Concerning the People and Resources of South Dakota.

1889

Richard F. Kneip, Governor

SOUTH DAKOTA FACTS:

AN ABSTRACT OF STATISTICS AND GRAPHICS CONCERNING THE PEOPLE AND RESOURCES OF SOUTH DAKOTA

OFFICE OF EXECUTIVE MANAGEMENT

SOUTH DAKOTA STATE PLANNING BUREAU

RICHARD F. KNEIP, GOVERNOR

Dan R. Bucks, Commissioner
Harley T. Duncan, Deputy Commissioner
Paul A. Tessar, Chief, Planning Information Assistance Section

The preparation of this document was financed in part through a Comprehensive Planning and Management Grant from the U. S. Department of Housing and Urban Development under the provisions of Section 701 of the Housing Act of 1954, as amended, through a Public Investment Planning Grant from the Old West Regional Commission, and through an EDA grant under Section 302(a) of the Public Works and Economic Development Act of 1965, as amended.

This publication was printed at a cost of $9.36 per copy. 1200 copies were printed for the purpose of supplying information for planning and decision making by public officials and citizens of South Dakota.

Introduction . . . i
Planning and Development Districts Map . . . ii
Acknowledgements . . . iii

NATURAL RESOURCES . . . 1

CHAPTER I. LAND

Physiographic Regions (Map) . . . 3
Geology (Map) . . . 4
Major Land Resource Areas (Map) . . . 5
Soil Survey Progress, 1976 (Map) . . . 6
Annual Soil Loss, 1967 (Map) . . . 7
Land Use in Acres, 1967 (Table) . . . 8
Level I Land Use, 1973 (Map) . . . 9
Brookings County Land Use, 1974 (Map) . . . 10
Stanley County Land Use, 1973 (Map) . . . 12
Estimated Net Changes in Cropland, 1974-1975 (Table) . . . 14
Land Ownership, 1976 (Table) . . . 15
Approximate Market Value of Agricultural Land, 1966-1975 (Table) . . . 16

CHAPTER II. WATER

Major Drainage Basins (Map) . . . 17
Suspended Sediment Concentration (Map) . . . 18
Dissolved Solids Concentration (Map) . . . 19
Number of Water Permits Issued, 1955-1976 (Table) . . . 20
Quantity of Water From Issued Permits, 1955-1976 (Table) . . . 21
Surface Water Area, 1967 (Table) . . . 21

CHAPTER III. CLIMATE AND AIR QUALITY

Average Annual and Growing Season Precipitation, 1890-1975 (Table and Figure) . . . 23
Average Annual Precipitation, 1941-1970 (Map) . . . 24
Normal Growing Season Precipitation, 1941-1970 (Map) . . . 25
Average Date of Last Spring Frost (Map) . . . 26
Average Date of First Fall Frost (Map) . . . 27
Average Monthly Precipitation and Temperature (Figures)
    Camp Crook, Lead, Rapid City, Mobridge, Dupree, Pine Ridge . . . 28
    Aberdeen, Pierre, Vermillion, Watertown, Mitchell, Brookings . . . 29
Air Quality, 1973-1975 (Table and Map) . . . 30

CHAPTER IV. PLANTS AND ANIMALS

Predominant Major Vegetation (Map) . . . 31
Potential Carrying Capacity--Deer, 1975 (Map) . . . 32
Potential Carrying Capacity--Antelope, 1975 (Map) . . . 33
Potential Carrying Capacity--Pheasant, 1975 (Map) . . . 34
Potential Carrying Capacity--Grouse, 1975 (Map) . . . 35

CHAPTER V. MINERALS AND ENERGY

Gold and Silver Production, 1950-1973 (Table) . . . 37
Sand and Gravel Production, 1950-1973 (Table) . . . 37
Coal Production, 1950-1973 (Table) . . . 37
Oil Production, 1954-1973 (Table) . . . 37
Lignite Availability (Table) . . . 37
Coal Resources (Map) . . . 38
Geothermal Resources (Map) . . . 39
Motor Fuel Consumption, 1950-1975 (Figure and Table) . . . 40
Energy Use by Sector, 1973 (Table) . . . 41
Per Capita energy Use, 1973 (Table) . . . 41
Electric Power Generation and Capacity, 1973 (Table) . . . 41
Energy Uses and Sources, 1973 (Figure) . . . 41

POPULATION AND SOCIETY . . . 43

CHAPTER VI. POPULATION

Population Composition by Age and Sex, 1940-1970 (Figure) . . . 47
Total Population, 1890-1975 (Table and Figure) . . . 48
Percent Population Change, 1890-1975 (Table) . . . 49
County Population as Percent of Total State Population, 1890-1975 (Table) . . . 50
Change in County Percent of Total State Population, 1890-1975 (Table) . . . 51
Percent Population Change, 1890-1975 (Maps) . . . 52
County Population as Percent of Total State Population, 1890-1975 (Maps) . . . 54
Change in County Percent of Total State Population, 1890-1975 (Maps) . . . 56
Indian Population, 1930-1970 (Table) . . . 58
Percent Indian Population, 1970 (Map) . . . 59
Population Distribution by Age Group, 1940-1975 (Table) . . . 60
Proportional Population Distribution by Age Group, 1940-1975 (Figure) . . . 64
Population Trends, 1940-1975 (Figure) . . . 65
Median Age, 1890-1970 (Figure and Table) . . . 65
Population Change, 1950-1975 (Table) . . . 66
Population Migration, 1950-1975 (Table) . . . 66
Population Density, 1940-1975 (Table) . . . 66
Population Density, 1975 (Map) . . . 67

Page

CHAPTER VII. VITAL STATISTICS

Vital Statistics--Births, 1959-1974 (Table) . . . 69
Deaths by Cause, Age, Race, Sex, 1959-1974 (Table) . . . 70
Total Number of Deaths, 1959-1974, 3-year Averages (Table) . . . 74
Deaths Due To Heart Disease, 1959-1974, 3-year Averages (Table) . . . 75
Deaths Due To Cancer, 1959-1974, 3-year Averages . . . 76
Deaths Due To Cerebrovascular Causes, 1959-1974, 3-year Averages (Table) . . . 77
Deaths Due To Motor Vehicle Accidents, 1959-1974, 3-year Averages (Table) . . . 78
Deaths Due To Other Accidents, 1959-1974, 3-year Averages (Table) . . . 79

CHAPTER VIII. HEALTH AND SOCIAL SERVICES

Medical Personnel and Facilities, 1974-1976 (Table) . . . 81
Numbers of Physicians 1940-1976 (Table) . . . 82
Population/Physicians Ratio, 1940-1976 (Table) . . . 82
Physician (M.D. and D.O.) Ages by Planning District, 1976 (Table) . . . 83
Location and Numbers of Physicians, 1976 (Map) . . . 84
Location of Hospitals and Numbers of Beds, 1976 (Map) . . . 85
Location of Ambulance Services, 1976 (Map) . . . 86
Intermediate Care Facilities, Recipients and Payments, 1973-1975 (Table) . . . 87
Nursing Home Facilities, Recipients and Payments, 1973-1975 (Table) . . . 88
Intermediate Care and Nursing Facilities Summary, 1973-1975 (Table) . . . 89
Aid To Dependent Children, Recipients and Payments, 1973-1975 (Table) . . . 90
Poverty Status of Persons and Families, 1959 and 1969 (Table) . . . 91

CHAPTER IX. EDUCATION

Total School Age Children, 1925-1975 (Table) . . . 93
Total School Enrollment, 1970-1975 (Table) . . . 94
School Enrollment, Public/Private by Sex, 1975 (Table) . . . 95
School Age Population--State Summary, 1925-1975 (Table and Figures) . . . 96
Number of Teachers and Student Enrollments, 1965-1975 (Figure and Table) . . . 97
High School Graduate Follow-up, 1925-1975 (Figure and Table) . . . 98
School Finance, 1960-1976 (Table) . . . 99
Elementary and Secondary School Graduates, 1933-1974 (Table) . . . 99
College and University Enrollments, 1970-1975 (Table) . . . 100
Graduates by Area of Study, 1968-1973 (Table) . . . 104
State Appropriations Per Student, 1968-1974 (Table) . . . 106
Per Student Appropriated Funds by Institutions, 1968-1973 (Figure and Table) . . . 107
Higher Education Finance, 1960-1977 (Table) . . . 108
Vocational Education, 1972-1976 (Table) . . . 109

CHAPTER X. HOUSING

Total Units, Occupied, 1940-1970 (Table) . . . 111
Housing By Tenure, 1940-1970 (Table) . . . 112
Financial Characteristics, 1940-1970 (Table) . . . 113
Occupancy Characteristics, 1940-1970 (Table) . . . 114

CHAPTER XI. POLITICS

General Election Results by County, 1930-1974 (Table) . . . 117
Percent Republican Votes for Governor, 1932-1974 (Map) . . . 142
Votes for President and Governor, 1890-1974 (Figure) . . . 144

THE ECONOMY . . . 145

CHAPTER XII. INCOME

Personal Income, 1965-1974 (Figure) . . . 147
Personal Income as Percent of U.S. Personal Income, 1965-1974 (Figure) . . . 147
Per Capita Personal Income, 1965-1974 (Figure) . . . 147
Per Capita Personal Income as Percent of U.S. Per Capita Personal Income, 1965-1974 (Figure) . . . 147
Personal Income by County, 1929-1974 (Table) . . . 148
Personal Income by County, 3-year Average, 1972-1974 (Map) . . . 149
Per Capita Personal Income by County, 1929-1974 (Table) . . . 150
Per Capita Personal Income by County, 3-year Average, 1972-1974 (Map) . . . 151
Per Capita Personal Income as Percent of U.S. Per Capita Personal Income, by County, 1929-1974 (Table) . . . 152
Personal Income by Major Source, 1962-1974 (Table) . . . 153
Percent Personal Income by Major Source, 1962-1974 (Table) . . . 153
Labor and Proprietor's Income, 1965-1974 (Figure) . . . 154
Labor and Proprietor's Income, Farm and Nonfarm, 1965-1974 (Figure) . . . 154
Farm and Nonfarm Proprietor's Income, 1965-1974 (Figure) . . . 154
Private Nonfarm Income, 1965-1974 (Figure) . . . 154
Personal Income by Major Source, by County, 1962-1974 (Table) . . . 155
Components of Farm Income, 1924-1974 (Table) . . . 189
Cash Receipts from Farm Marketings by County, 1967-1974 (Table) . . . 190
Realized Gross and Net Farm Income, 1949-1974 (Figure) . . . 190
Cash Receipts from Crops and Livestock, 1924-1974 (Figure) . . . 190
Cash Receipts from Livestock by County, 1971-1974 (Table) . . . 191
Cash Receipts from Crops by County, 1971-1974 (Table) . . . 191
Cash Receipts from Farm Marketings by County, 3-year Average, 1972-1974 (Map) . . . 192
Cash Receipts from Crops as Percent of Cash Receipts from Farm Marketings by County, 3-year Average, 1972-1974 (Map) . . . 193
Distribution of Personal Income, 1940-1970 (Table) . . . 194
Median Income by County, 1940-1970 (Table) . . . 194
Distribution of Personal Income by County, 1969 (Table) . . . 195

Page

CHAPTER XIII. EMPLOYMENT

Civilian Labor Force, 1960-1975 (Table). 197
Civilian Labor Force, 1960-1975 (Figure) 197
Labor Force as Percent of Total Population, 1960-1975 (Figure) 197
Civilian Labor Force by County, 1970-1974 (Table). 197
Labor Force by Age and Sex, 1940-1970 (Table). 198
Total Employment, 1960-1975 (Table and Figure) 199
Total Employment by County, 1967-1974 (Table). 199
Total Employment by County, 3-year Average, 1972-1974 (Map). 200
Total Employment by County, 1940-1970 (Table). 201
Employment by Class of Worker and Sex, 1940-1970 (Table) 201
Total Employment by Sex, 1940-1970 (Figure). 202
Total Employment by Major Sector, 1940-1970 (Figure) 202
Farm Employment by Sex, 1940-1970 (Figure) 202
Nonfarm Employment by Sex, 1940-1970 (Figure). 202
Employment by Industry, 1967-1974 (Table). 203
Percent Employment by Industry, 1967-1974 (Table). 203
Total Wage and Salary Employment , 1967-1974 (Figure) 204
Number of Proprietors, 1967-1974 (Figure). 204
Wage and Salary Employment, 1967-1974 (Figure) 204
Nonfarm Wage and Salary Employment, 1967-1974 (Figure) 204
Government Employment, 1967-1974 (Figure). 204
Private Nonfarm Employment, 1967-1974 (Figure) 204
Employment by Industry, by County (Table) 205
Total Unemployment, 1960-1975 (Table). 228
Total Unemployment Rate, 1960-1975 (Figure). 228
Total Number Unemployed, 1960-1975 (Figure). 228
Average Monthly Unemployment Rate, 1961-1975 (Figure). 228
Monthly Unemployment Rate, 1961-1975 (Table) 228
Total Unemployment by County, 1970-1974 (Table). 229
Unemployment Rate by County, 1970-1974 (Table) 229
Unemployment Rate by County, 3-year Average, 1972-1974 (Map) 230
Characteristics of the Insured Unemployed, 1965-1975 (Table) 231
Insured Unemployment by Sex, 1965-1975 (Figure). 231
Insured Unemployment by Age, 1965-1975 (Figure). 231
Insured Unemployment by Race, 1965-1975 (Figure) 231
Percent of Insured Unemployment by Age, Sex, etc., 1965-1975 (Table) 232
Unemployment Rate by Industry, 1965-1975 (Table) 232
Average Weekly Earnings by Industry, 1951-1974 (Table) 233
Average Weekly Hours by Industry, 1951-1974 (Table). 234
Average Weekly Hours, 1953-1974 (Figure) 235
Average Weekly Earnings in Durable Manufacturing, 1953-1974 (Figure) 235
Average Weekly Earnings in Nondurable Manufacturing, 1953-1974 (Figure). 235
Average Weekly Earnings by County, 1971-1974 (Table) 235
Work Stoppages, 1956-1973 (Table). 236
Number of Workers Involved in Work Stoppages, 1956-1973 (Figure) 236
Number of Days Idle Due to Work Stoppages, 1956-1973 (Figure). 236
Percent of Total Working Time Lost Due to Work Stoppages, 1956-1973 (Figure) . . . 236

CHAPTER XIV. PRODUCTION AND BUSINESS ACTIVITY

Value Added by Industry, 1955-1974 (Table) 237
Gross State Product, 1965-1974 (Figure). 237
Gross State Product, Private, 1955-1974 (Figure) 237
Gross State Product, Private Nonfarm, 1955-1974 (Figure) 237
Productivity Indices, U.S., 1947-1975 (Table). 238
Index of Unit Labor Costs, U.S., 1947-1975 (Figure). 238
Index of Output Per Hour, U.S., 1947-1975 (Figure) 238
Capital Expenditures, 1955-1973 (Table and Figure) 239
Building Permits, 1965-1975 (Table and Figure) 239
Car Registrations by County, 1961-1974 (Table) 240
Truck Registrations by County, 1961-1974 (Table) 241
Motorcycle Registrations by County, 1961-1974 (Table). 242
Car Registrations, 1961-1974 (Figure). 243
Truck Registrations, 1961-1974 (Figure). 243
Motorcycle Registrations, 1961-1974 (Figure) 243
Per Capita Vehicle Registrations, 1965-1974 (Figure). 243
Total Dollar Hunting and Fishing License Sales by County, 1965-1973 (Table). . . . 244
Total Dollar Hunting and Fishing License Sales by County, 3-year Average,
1971-1973 (Map) 245
Number of Hunting and Fishing Licenses Sold by County, 1973 (Table). 246
Railroad Mileage by County, 1974 (Table amd Map) 247

CHAPTER XV. MONEY AND PRICES

Total Deposits with Commercial Banks, 1955-1974 (as of Dec. 31) (Table & Figure) . 249
Accounts with Savings and Loan Institutions, 1955-1974 (as of Dec. 31)
(Table and Figure). 249
Number of Commercial Banks by County, as June 30, 1975 (Table) 249
Total Deposits with Commercial Banks by County, 1970-1975 (as of June 30) (Table). 250
Total Deposits with Commercial Banks by County, 3-year Average, 1973-1975 (Map). . 251
Demand Deposits with Commercial Banks by County, 1970-1975 (as of June 30) (Table) 252
Time Deposits with Commercial Banks by County, 1970-1975 (as of June 30) (Table) . 252
Total Assets of Commercial Banks by County, 1970-1975 (as of June 30) (Table). . . 253
Total Loans of Commercial Banks by County, 1970-1975 (as of June 30) (Table) . . . 253
Assets of Commercial Banks by County, 3-year Average, 1973-1975
(as of June 30) (Map) 254
Loans to Assets Ratio for Commercial Banks, by county, 3-year Average, 1973-1975
(as of June 30) (Map) 255

Page

Loans to Assets Ratio for Commercial Banks by County, 1970-1975
(as of June 30) (Table) 256
Loans and Assets of Commercial Banks, 1970-1975 (as of June 30) (Figure) 256
Loans to Assets Ratio for Commercial Banks, 1970-1975 (as of June 30) (Figure) . . . 256
Consumer Price Indices by Expenditure Class, U.S., 1929-1975 (Table) 257
Consumer Price Index, All Items, U.S., 1929-1975 257
Prices Paid and Received by Farmers, 1940-1975 (Table and Figure) 258
Prices Paid by Farmers, Living Expenses, 1940-1975 (Figure) 258
Prices Paid by Farmers, Production Expenses, 1940-1975 (Figure) 258
Prices Received by Farmers, Livestock, 1909-1975 (Table) 259
Prices Received by Farmers, Crops, 1909-1975 (Table) 260
Implicit Price Deflators, U.S., 1955-1974 (Table) 261
Implicit Price Deflator, Gross State Product, 1955-1974 (Table) 261
Implicit Price Deflator, Personal Consumption Expenditures, U.S.,
1946-1975 (Figure) 261
Bond Yields and Interest Rates, U.S., 1929-1975 (Table) 262
Corporate Bond Yields, U.S., 1939-1975 (Figure) 262
FHA New Home Mortgage Yields, U.S., 1949-1975 (Figure) 262

CHAPTER XVI. GOVERNMENT FINANCES

Total State Government Revenues and Expenditures, 1968-1975 (Table and Figure) . . . 263
Per Capita State Government Revenues and Expenditures, 1968-1975 (Table & Figure) . 263
State Government Revenues by Source, 1968-1975 (Table) 264
Per Capita State Government Revenues by Source, 1975 (Figure) 265
State Government Revenues by Source, 1968-1975 (Figure) 265
Per Capita State Government Revenues by Source, 1968-1975 (Table) 265
State Government Receipts by Source, 1971-1975 (Table and Figure) 266
Total General Fund Net Receipts, Fiscal Years, 1970-1975 (Table) 266
Selected State Government Tax Rates, 1954-1974 (Table) 266
State Sales Tax Collections, 1976 (Table and Map) 267
Auto Registration Fees by County, 1972-1975 (Table) 268
Motor Fuel Tax Fund Distributions by County, 1972-1975 (Table) 268
State Government Expenditures by Type, 1968-1975 (Table) 269
State Government Expenditures by Type, 1968-1975 (Figure) 270
Per Capita State Government Expenditures by Type, 1975 (Figure) 270
Per Capita State Government Expenditures by Type, 1968-1975 (Table) 270
State Government Indebetdness, 1968-1975 (Table) 271
Total State Government Indebtedness, 1968-1975 (Figure) 271
State Government Cash and Security Holdings, 1968-1975 (Table and Figure) 271
Total Property Tax Collections by County, 1955-1974 (Table) 272
Property Tax Collections by Source by County, 1974 (Table) 272
Total Property Tax Collections by County, 3-year Average, 1972-1974 (Map) 273
Total County Expenditures, 1971-1974 (Table) 274
Total Taxable Value of All Property by County, 1971-1974 (Table) 274
Total County Expenditures, 3-year Average, 1972-1974 (Map) 274
Total Taxable Value of All Property by County, 3-Year Average, 1972-1974 (Map) . . 276

CHAPTER XVII. HISTORICAL PERSPECTIVES

Farm Acreage, Size and Number, 1930-1975 (Figure and Table) 279
Number of Farms, 1920-1969 (Table) 280
Average Farm Size, 1920-1969 (Table) 281
Acres Planted and Percent Harvested for Major Crops, 1930-1975 (Table) 282
    Corn (Figure) 283
    All Wheat (Figure) 283
    Oats (Figure) 284
    Barley (Figure) 284
    Rye (Figure) 284
    Flaxseed (Figure) 285
    Soybeans (Figure) 285
    Sorghum (Figure) 285
Livestock Numbers, 1930-1976 (Figure and Table) 286
    Cattle, Hogs, Sheep and Lambs, Chickens 286

CHAPTER XVIII. COUNTY COMPARISONS

Acres Planted and Harvested, Yield Per Acre, & Production for Major Crops, 1969-74

    All Hay, Alfalfa Hay (Tables and Maps) 287
    Corn (Tables and Maps) 294
    All Wheat (Tables and Maps) 298
    Winter Wheat (Tables and Maps) 302
    Durum Wheat (Tables and Maps) 306
    Other Spring Wheat (Tables and Maps) 310
    Oats (Tables and Maps) 314
    Barley (Tables and Maps) 318
    Rye (Tables and Maps) 322
    Flax (Tables and Maps) 326
    Soybeans (Tables and Maps) 330
    Sorghum (Tables and Maps) 334

Total Farm Value for Major Crops, 1969-1974

    All Hay (Table) 338
    Corn (Table) 339
    All Wheat (Table) 339
    Winter Wheat (Table) 340
    Durum Wheat (Table) 340
    Other Spring Wheat (Table) 340
    Oats (Table) 341
    Barley (Table) 341
    Rye (Table) 342
    Flax (Table) 342
    Soybeans (Table) 343
    Sorghum (Table) 343

Page

Livestock Numbers and Total Farm Value, 1969-1975
    All Cattle (Table) 344
    Beef Cows (Table). 345
    Milk Cows (Table). 346
    Hogs (Table) 347
    Sheep and Lambs (Table) 348
    All Chickens (Table) 349

CHAPTER XIX. STATE AND PLANNING DISTRICT COMPARISONS

State Totals for Acres Planted and Harvest, Yield Per Acre, Production, and Farm Value, 1969-1974

    All Hay (Figures and Table). 351
    Alfalfa Hay (Figures and Table). 352
    Corn (Figures and Table) 353
    All Wheat (Figures and Table). 354
    Winter Wheat (Figures and Table) 355
    Durum Wheat (Figures and Table). 356
    Other Spring Wheat (Figures and Table) 357
    Oats (Figures and Table) 358
    Barley (Figures and Table) 359
    Rye (Figures and Table). 360
    Flax (Figures and Table). 361
    Soybeans (Figures and Table) 362
    Sorghum (Figures and Table). 363

Livestock Numbers and Total Farm Value, 1969-1975

    All Cattle 364
    Beef Cattle. 364
    Milk Cows. 364

INTRODUCTION

South Dakota Facts contains a broad variety of data on the people, resources agriculture, and economy of South Dakota. Almost all of these data are available elsewhere, but are for the first time, being presented in a single, compiled source. This statistical abstract is intended as a handy reference book for the government and people of South Dakota. Chapter introductions have been prepared to assist the reader and explain some of the more complex tables, maps, and figures.

Throughout this abstract, data are presented for the state, counties, and planning and development districts. The accompanying map shows the respective boundaries of those entities. For the planning districts, time series information dating back to 1940 is often reported. Although the districts themselves did not exist until the 1970's, older data have been grouped by district and are presented for comparative purposes.

While it would have been desirable to include more spatially detailed data in this publication (e.g. municipalities and minor civil divisions), the non-comprehensive nature of such data and our space limitations did not allow its inclusion.

In all the computer produced tables presented here, you may notice some peculiar spellings for county names. Due to space limitations and formatting, we chose to abbreviate county names where necessary so that each was no longer than eight characters (e.g. MINNEHAH instead of MINNEHAHA).

Additional information and analysis concerning the data in this book is available from the State Planning Bureau. If, in reviewing this volume, you feel that you know the source of more accurate, detailed, or better data, please contact the Planning Information Assistance Section of the Bureau. Also, please notify the Bureau of any errors you may find in this book. While every reasonable precaution was taken to prevent errors, it is virtually impossible to achieve 100% accuracy in a publication of this size.

ACKNOWLEDGEMENTS

During the 1970's under the leadership and direction of Governor Richard F. Kneip and with the support of actions by the South Dakota Legislature, several major steps were taken to establish comprehensive planning as an effective tool for policy management in the executive branch. These efforts were made on the belief that good planning can aid government both in anticipating problems before they become crises and in shaping effective and coordinated responses to public problems or opportunities.

One of these early steps to improve planning was a commitment, made first by my predecessor, Dr. Lynn Muchmore and continued through to the present, to making quality information available for decision making at the state and local level. From that commitment came the decision to develop a policy-relevant information system for South Dakota state government. Work began on the development of this system in mid-1974. South Dakota Facts is a major product of that information system.

In this section, I would like to acknowledge as completely as possible the many contributions made by several individuals to the production of this document. Without their dedication and determination, a product of this magnitude could not have become a reality. Unless otherwise noted, those individuals cited served on the staff of the State Planning Bureau during the time of their contribution to this project.

The idea to develop a statistical abstract for South Dakota was originally proposed in the fall of 1973 by James Villone. From mid-1974 through the present, those individuals who shared in the administrative decision making and supervision with respect to the information system and South Dakota Facts included Harley Duncan, Paul Tessar, Walter Busse, and Oscar Lund.

The data in this document were developed and produced in broad categories: natural resources, population and society, the economy, and agriculture. Each section was produced by a team consisting of one individual charged with formulating and reviewing the contents of the section, and a larger group responsible for compiling, organizing, and displaying the data.

The natural resources section was formulated by Ken Hansen and produced by Mr. Hansen, Paul Tessar, Mark Anderson, and Jeff Eidenshink. The population and society section was formulated by Walter Busse and produced by Mr. Busse, Morris Kvamme, Paul Tessar, Jerry Schlesinger, and Carolyn Green and Dorothy Fullenkamp of the University of South Dakota Computer Center. The economic section was formulated by Robert Collins and produced by Mr. Collins and Paul Tessar. The agriculture section was formulated by Jeff Eidenshink and produced by Kevin Retrum, Paul Tessar, Jerry Schlesinger, and Morris Kvamme.

Dr. Alan Clem, Chairman, Department of Government, University of South Dakota, was responsible for producing a special compilation of verified election results which are printed in this document and made available to South Dakotans for the first time. Dr. Ralph Brown, Department of Economics, Northern State College, developed the estimates for value added by industry included in Chapter XIV.

Dedicated work on production tasks for the entire document was performed by several individuals. Mark Anderson was responsible for extensive layout and copy preparation work. Kevin Retrum and Morris Kvamme performed various data compilation and general computer tasks. Ken Hansen performed all manual cartographic work. Paul Tessar developed the computer cartography and most other computer software for the project. Jerry Schlesinger developed all the software and most of the data displays for the line plots, histograms, and pie charts.

Numerous individuals aided in this project by reviewing drafts of materials intended for inclusion in this document. These individuals included: Art Wilner, Ed DeAntoni, Mary Jane Nelson, Karen Graves, Nancy Davis, Gordon Boe, Ed McGuire, Scott McGregor, Bruce Lutz, William Glennon and James Dick, Ray Gaarder, S.D. Department of Agriculture, and John Ranek, Crop and Livestock Reporting Service.

Typing and table preparation were performed by the able clerical staff of the Bureau consisting of Pat VanKlompenburg, Supervisor, Wilma Obenauer, and Dianne Henson.

NATURAL RESOURCES

LAND
WATER
CLIMATE and
AIR QUALITY
PLANTS and ANIMALS
MINERALS and ENERGY

CHAPTER I. LAND

This chapter is concerned with the land of South Dakota, not only its physiography, geology, and soils, but also its use, ownership, and approximate market value. The maps and tables in this chapter are for the most part self-explanatory. Two, however, deserve some comment because of their similarity to each other. The first map in this chapter shows the Physiographic Regions of South Dakota. A physiographic region is an area characterized by a particular type of physical feature on the earth's surface, in other words, the general look of the land. Such features as lake plains, table lands, or hills represent physiographic regions. A similar type of areal delineation is shown on the third map--Major Land Resource Areas. Instead of being delineated on the basis of physiography, these areas are characterized by a particular combination or pattern of soils (including slope and erosion), climate, water resources, land use, and types of farming.

CHAPTER II. WATER

Knowledge concerning life-sustaining water is valuable everywhere. In South Dakota, water is of major economic importance and must be studied carefully and used wisely. In this chapter, the data concerning the state's water resources are displayed in both map and table form illustrating its location, quality, abundance, and use.

The location of water is shown in two ways: a map of Major Drainage Basins, and a table showing the acres of surface water in each county. Surface water area, especially in the smaller water bodies, is subject to seasonal and longer range climatic fluctuations. Water quality is illustrated by the use of two maps: one indicating suspended sediment concentration and the other dissolved solids concentration. Use of South Dakota water is shown in tabular form on the basis of number of water permits issued and quantity of water allowed from those issued permits. Although these records give a valuable account of water use, it should be remembered that the issuance of a permit does not require the holder to use that water.

CHAPTER III. CLIMATE AND AIR QUALITY

Knowledge of South Dakota's climate is invaluable to the farmers, ranchers, and other agriculturalists within the state. The first two maps showing average annual precipitation and growing season precipitation are compiled from the most recent 30-year block of data (1941-1970) which the National Weather Service uses. Previously published maps using the 1931-1960 block differ somewhat from this map because of the inclusion of the data from the 1930's drought. Thus, the particular 30-year block that is used does affect the resultant map. It should be noted that data since 1970 is not reflected in the maps but is included in the plots and tables on the first page of this chapter.

The collection of air quality data in the State is a relatively recent occupation. Data are tabled here for particulates (1973, 1974, 1975) and for SO_2 (sulfur-dioxide, 1975).

CHAPTER IV. PLANTS AND ANIMALS

The map of major vegetation associations indicates the potential natural vegetation in the state. (Over the last century, cultivation and grazing have altered the composition of South Dakota grasslands to something other than the indicated potential.) Differences in native grassland types are correlated closely with precipitation. Exclusive of the Black Hills, precipitation increases from west to east; thereby creating north-south belts of grassland types. Boundaries between vegetation types are not as sharp and distinct as they appear on the map, but undergo broad transitions. Numerous environmental factors, aside from precipitation, affect the kind of vegetation present in a specific area. Thus, a particular vegetation type is not necessarily restricted to the indicated limits on the map. The map and above text were adapted from Plants of South Dakota Grasslands, Bulletin 566, Agricultural Experiment Station, South Dakota State University.

Many more types of animals exist in South Dakota than could be enumerated here. Shown in map form is the potential carrying capacity for four of the more common game animals: deer, antelope, pheasant, and grouse. The potential carrying capacity is the maximum density of wild game that a particular range is capable of supporting, based on the reproductive potential of a species and its land use preference. The capacity does not necessarily indicate the density in any one year but rather the potential density.

CHAPTER V. MINERALS AND ENERGY

The first page in this chapter contains tables showing the history of the state's production of the most important metallic and non-metallic minerals (gold and silver, sand and gravel) and organic fuels (coal, oil) as well as lignite availability on a county basis. Lignite is a coal of woody appearance that is usually considered to represent the second stage in the transformation of vegetation through peat into coal; it is a sub-bituminous coal. Many more such tables can be reviewed in State Geological Survey publication Bulletin #16: Mineral and Water Resources of South Dakota.

The first map in this chapter, Coal Resources, shows areas that are underlain by rocks that ordinarily contain lignite. The lignite may be thin or even absent in much of the area outlined. The lignite availablility table on the first page in this chapter gives an indication of the coal resources in each county. All known coal in South Dakota is less than 1000 feet below the surface.

Several major aquifers, underlying about 40,000 square miles, yield hot water at temperatures above 38 C (100 F). These areas are shown on the second map, Geothermal Resources. At least eight major geologic units contain "hot-water" aquifers, and the aggregate thickness of these units ranges from less than 100 feet to more than 500 feet.

Energy use is illustrated on the last two pages. The first of these contains plots showing motor fuel consumption on a monthly basis for a typical year (1970), and annually (1950-1975). The last page shows tables indicating estimates of energy use per capita and by sector, and electric power generation. The South Dakota Department of Transportation supplied the motor fuel consumption data while the S.D. Energy Policy Office provided the other energy use estimates.

source: *USDA SOIL CONSERVATION SERVICE, 1967 CONSERVATION NEEDS INVENTORY.*
A 100% enumeration of 1973-74 land use as derived from digital LANDSAT
data will be completed 10/1/76 by the South Dakota State Planning Bureau.
This data will be available in both map and tabular format.

SOUTH DAKOTA LAND USE PATTERNS — SPRING 1973

■ **URBAN**- Areas of intensive use with much of the land covered by structures.

▨ **CROPLAND**- Land used primarily for production of agricultural commodities.

☐ **RANGELAND**- Land where the natural vegetation is predominatly grasses, grasslike plants, forbs, or shrubs.

■ **FOREST**- Lands that are at least 10 percent stocked by trees capable of producing timber or other wood products.

■ **WATER**- Rivers, streams, lakes, and semi-natural water bodies.

▨ **WETLANDS**- Seasonally flooded basins and flats, meadow, marshes and bogs.

░ **BARREN LAND**- Land of limited ability to support life and little or no vegetation.

Generalized land use patterns were interpreted from specially processed color enhanced and color balanced Earth Resources Technology Satellite (LANDSAT I) imagery provided by Dr. J. Ron Eyton, Department of Geography, University of Illinois. The imagery was recorded on 35mm slides, four slides per image. An interpretation system was used whereby the imagery was projected onto a 1:250,000 scale base map and subsequently interpreted at a 160 acre cell size using the Anderson Classification Scheme. The 1:250,000 scale interpretation was then cartographically generalized and reduced to the scale of 1:500,000. The final product was photographically reduced to a scale of 1:1,000,000.

This map was prepared by the South Dakota State Planning Bureau under legislative authorization and appropriations to conduct land use inventories. The project was under the supervision of Oscar M. Lund, Senior Planner-Natural Resource Section and Paul A. Tessar, Chief of the Land Use Inventory project. The image interpretation, cartography, and printing layout arrangements were performed by Jeff Eidenshink, Data Analyst, Natural Resource Section.

A larger map showing greater detail may be obtained by writing the State Planning Bureau in Pierre, SD.

1/ THESE FIGURES INCLUDE BOTH ALLOTTED TRUST AND TRIBAL TRUST LANDS.

2/ THE AMOUNT OF PRIVATELY OWNED LAND WAS CALCULATED BY SUBTRACTING STATE, FEDERAL, AND INDIAN LANDS FROM THE TOTAL LAND AREA. CONSEQUENTLY, THE FIGURES FOR PRIVATE LAND MAY INCLUDE CITY AND/OR COUNTY LANDS.

TOTAL FUELS LESS PURCHASED ELECTRICITY	193.039		

[1] CONVERSION FACTORS

Coal	21.6 million BTU/ton
Petroleum	
LPG	92,000 BTU/gallon
Distillate Oil	138,690 BTU/gallon
Residual Oil	149,690 BTU/gallon
Kerosine	135,000 BTU/gallon
Motor Gasoline	125,000 BTU/gallon
Natural Gas	1031 BTU/cubic foot
Electricity	
Consumption	3,412 BTU/KWH
Production	10,500 BTU/KWH

Most of the conversions above are consistant with those commonly cited by the United States Department of the Interior Bureau of Mines. LPG is usually 95,000 BTU/gallon and propane is 91,500 BTU/gallon. Since most of the LPG imported into South Dakota is in the form of propane, the figure for LPG has been reduced to 92,000 BTU/gallon for this report. The coal conversion figure is an average of the BTU contents of Kentucky coal and Wyoming coal.

PER CAPITA ENERGY CONSUMPTION, 1973 [2]

	MILLION BTU	AMOUNT
Liquefied Petroleum Gas (LPG)	16.597	180 gallons
Distillate Oil	35.463	255 gallons
Residual Oil	2.163	14.5 gallons
Kerosine	.116	.865 gallon
Motor Gasoline	96.618	772 gallons
Natural Gas	47.318	45.896 thousand cubic feet
Coal	12.896	.597 ton
Hydroelectric power [3]	74.040	7051 kilowatt hours
Total Energy	285.203	

[2] Based on a population of 680,000

[3] Most of the hydroelectric power of South Dakota is exported, therefore this per capita figure is not indicative of true consumption.

ELECTRICAL GENERATION [5]

POWER FACILITY	APPROXIMATE ANNUAL PRODUCTIONS (KWH)	GENERATING CAPACITY (KW)
Big Stone	2,976,000,000	440,000

CHAPTER VI. POPULATION

This chapter consists of an overview of population data. Included are population trends from the first Census in 1890 (following statehood in 1889) to the 1975 estimates of the Federal-State Cooperative Program for Local Population Estimates. In addition to reports of the numbers of inhabitants, there are also tables and graphics showing distribution of the population, both spatially and by age. The number and distribution of the state's primary minority, American Indian are also presented.

The tables, graphs, and population pyramids highlight age distributions over time. The differences that are evident reflect the effects of three major trends--increasing life span, decreasing birth rate, and patterns of migration.

The first three series of maps represent an effort to display trends in population movement and population concentration since 1890. The first series displays each county's population as a percentage of the total state population. Changes in the map pattern over the decades show, first, the westward progression of the population, and then, the relative concentration around major cities.

The second series highlights this process. By focusing on changes in the relative proportion of state population in each county, it identifies areas of growth and decline relative to the rest of the state. In other words, although experiencing absolute growth, an area may decline relative to the rest of the state if the population growth did not keep pace with that experienced by the state as a whole.

The third series of maps presents a measure of absolute growth and decline by decade. Taken in conjunction with the two preceding series, it further illustrates population trends, particularly in view of the relative stability of total state population in recent decades.

All of the data presented here, unless otherwise noted, are drawn from U. S. Census Bureau publications. For 1890 through 1970, the data comes from the reports of the decennial census and represent the population as of April 1 of the census year. The 1975 data are July 1, 1975 estimates prepared by the Federal-State Cooperative Program for Local Population Estimates.

Some explanatory remarks are in order with respect to the data for the first three decennial reporting years--1890, 1900, and 1910. Several of the counties west of the Missouri River were organized, consolidated, or experienced major boundary revisions during that period. For the sake of comparability across time, the data are presented in tables and maps according to current county boundaries. In this process, every effort was made to identify original areas with corresponding current boundaries. In some cases minor distortions result, but the overall effect is to present a consistent set of data that is comparable over time.

A major problem encountered was former areas comprising two or more current counties. This was the case for Stanley County (Stanley, Jackson, Haakon), Lyman County (Lyman, Jones), Butte County (Butte, Harding, Perkins), Pine Ridge Indian Reservation (principally Shannon, Washabaugh, Bennett), and Rosebud Indian Reservation (principally Mellette, Todd, Tripp).

Further, in the 1900 census each Indian reservation was enumerated as a unit with no distribution by county. In 1890 all reservations were enumerated in a special census and reported without allocation to county or reservation.

For the purposes of the map series, populations of currently contiguous county areas were equally divided among the constituent parts. However, for 1890, the 19,792 people enumerated on reservations were excluded from the analysis because non-contiguous areas were combined and no acceptable subdivision was possible.

For the maps of 1900, the Indian Reservation populations were assigned to county areas as follows:

Pine Ridge: Shannon, Washabaugh, Bennett

Rosebud: Mellette, Todd, Tripp

Cheyenne River: Dewey

Standing Rock: Corson

While every effort was made to be as accurate as possible, data for 1890, 1900, and 1910 should be taken as generally indicative and not necessarily a precise representation.

CHAPTER VII. VITAL STATISTICS

The natural increase of a population is a function of the births and deaths occurring to residents. These two factors plus migration (presented in the population chapter) determine the magnitude of growth or decline of a population. This section presents an overview of recent experience in these components of population.

Live births to South Dakota residents (occurring in or out of the State) are presented for three recent three-year periods, 1959 to 1961, 1969 to 1971, and 1972 to 1974. The first two periods are centered on the census year of the past two decades. The third time period represents the most recent data available at the time this publication was prepared. Three years of data are averaged in each period in order to "smooth out" temporary increases or decreases. In this way, the data more clearly represents actual trends.

Two summary measures of births are presented. The first is the crude birth rate, which is simply a measure of the average number of births per 1,000 population. In each case the crude birth rate is calculated on the basis of the three-year average and the census (1960, 1970) or estimated (1973) population. The fertility rate, on the other hand, is the average number of births per 1,000 women in the ages 15 through 44. This figure is usually considered more representative of actual patterns. However, it can only be calculated in census years, since that is the only source of accurate counts of the population reported by age and sex.

The second component of natural increase is the number of deaths occurring in a year. Tables presented here show total deaths and the five major causes of death in South Dakota. The first table displays deaths by cause for age groups in the population. Following are a series of tables of three year average deaths by major cause for 1959-61, 1969-71, and 1972-74 by county or residence for all ages combined. The crude death rate is also reported as the average number of deaths per

1,000 population. Age and sex specific death rates are not calculated. Three year averages are again used to minimize the distortion due to natural disasters or epidemics in any one year.

Data presented here are from the Annual Reports of Department of Health Public Health Statistics.

CHAPTER VIII. HEALTH AND SOCIAL SERVICES

This chapter presents an overview of some of the facilities for medical care and other health-related services in South Dakota. Tables and maps display the number and location of doctors, hospitals (with bed counts), other health care personnel, and emergency medical services.

There are also data on facilities for nursing and long term care of the elderly. Data on Aid to Dependent Children and Poverty Status provide measures of the need for assistance by families and individuals in the state.

Medical facilities data were gathered from publications of the Department of Health Comprehensive Health Planning and Manpower Linkage Projects. Social and welfare services data are from Program Analysis Reports published by the Department of Social Services.

CHAPTER IV. EDUCATION

Adequate educational opportunities for citizens in one of the ways in which a state can contribute to the development of its human resources. This chapter provides an overview of the demand for and utilization of educational resources at all levels--elementary, secondary, and post-secondary. The data reported here were gathered from publications and personal inquiries of the Division of Elementary and Secondary Education, and the Board of Regents of the Department of Educational and Cultural Affairs.

Data presented on school enrollments in this chapter are by county of administration. Thus, some of the counties which show no children enrolled in elementary or secondary schools may actually have a school within their boundaries, but the school is administered by a neighboring county. In those cases, the students are counted with those of the administering county.

CHAPTER X. HOUSING

Housing conditions are an indication of the quality of personal environment enjoyed by the population. This chapter reviews some of the dimensions of the housing situation in South Dakota. Detailed housing data are available only from the decennial Census of Housing. Consequently, the data represent the housing situation in South Dakota every ten years--1940 to 1970.

CHAPTER XI. POLITICS

The voting pattern of the population of the state provides an insight into the political context within which public and private institutions operate. This chapter presents the partisan voting record for each county in the major elections--Presidential, Senatorial, Congressional, and Gubernatorial--for each election between 1930 and 1974. With two exceptions, the votes are reported for Republican and Democratic candidates only, and the percentages are based on the two-party vote. The two exceptions are 1948 (Henry Wallace) and 1968 (George Wallace). In these races the national significance of the candidates requires that their South Dakota following be reported.

In addition, there is a graph representing the vote distribution for Governor in all races since 1889, and President since 1932. This is basically a two-party, Republican-Democrat comparison. However, there were elections in which third-party or Independent candidates garnered at least 10% of the votes cast. These are included in the graph as "Third Party" candidates. On two occasions Andrew E. Lee won the Governorship as a Third Party candidate; in 1896 on the People's Party ticket and again in 1898 as the candidate of the Fusion Party. The voting patterns for Governor are further displayed in maps that show party majorities for each county in the years in which a new Governor was elected. Republican-Democrat vote margins in counties are also displayed on maps for each election since 1930 in which a new Governor came into office.

In the county listings of the votes for Representative, there is no identification of the Congressional district, since they do not always follow county boundaries. However, the accompanying list of victors does identify the successful candidate by District.

The data presented here were collected and prepared by the Governmental Research Bureau of the University of South Dakota, Vermillion under the direction of Dr. Alan Clem. Data on gubernatorial elections prior to 1930 were collected by the State Planning Bureau staff from the South Dakota Legislative Manual, 1975.

The following list displays the winning candidates in state electoral contests in elections for Governor since statehood and for other major offices since 1930:

SOUTH DAKOTA GOVERNORS 1889-1974

1889	Arthur C. Mellette, R
1890	Arthur C. Mellette, R
1892	Charles H. Sheldon, R

1972	James Abourezk, D	Frank L. Denholm, D	James Abdnor, R
1974	George McGovern, D	Larry Pressler, R	James Abdnor, R

[1] In 1930, there was a 3rd Congressional District. Wm. Williamson, R, was elected. South Dakota lost the third congressman as a result of reapportionment following the 1930 Census.

[2] Gladys Pyle, R, was elected to fill unexpired Senate term.

THE ECONOMY

An understanding of South Dakota's economic environment is fundamentally important to the economic decision making process. The five chapters of tables and graphic displays which follow are presented in an attempt to provide some insight into the various dimensions of the state's economy, and hence, to facilitate this decision making process. The contents of these chapters are outlined below.

CHAPTER XII. INCOME

Income is perhaps the single most significant indicator of the general economic climate. Personal income is the basic measure of income used in this chapter. Personal income is income received by individuals before taxes (except for social security taxes), and includes transfer payments and interest income received by individuals.

Personal income attributable to the farm sector accounts for approximately 30 per cent of all personal income in the State. Because of the importance of this industry, selected additional farm income measures are presented.

A final section of this chapter provides information concerning the distribution of income among families.

CHAPTER XIII. EMPLOYMENT

This chapter includes data concerning various aspects of employment in South Dakota. The first section presents labor force information. This is followed by employment data. The third section presents relevant unemployment statistics. The next section includes a series of data relating to the average weekly hours and earnings of production and nonsupervisory workers in manufacturing industries. Finally, information is presented regarding work stoppages. Together, these sections attempt to provide some insights into the nature and scope of recent trends in employment related variables.

In some instances, data for different time periods for the same variable are presented separately. These data are not necessarily comparable because the data come from different sources. It was believed that the additional historical perspective more than offset any resulting inconsistencies. Care should thus be exercised when making historical comparisons to insure that the data sources are comparable.

CHAPTER XIV. PRODUCTION AND BUSINESS ACTIVITY

In this chapter, estimates are presented of the value added by various industries operating within South Dakota. The value added by a particular industry is a measure of the final market value of that industry's output less the original value of the inputs which were used in the production process. Value added may thus represent the most concise measure of actual output produced. Gross State Product is simply computed as the sum of the value added by each of the component industries.

Data concerning the productivity of labor in South Dakota are not readily available. Productivity measures for the United States were presented based on the assumption that trends in South Dakota productivity will roughly follow the patterns exhibited for the entire nation.

Also included in the Chapter are several additional measures of overall business activity such as motor vehicle registrations, building permits, capital expenditures, and so on.

CHAPTER XV. MONEY AND PRICES

The first section of this chapter concentrates on deposits with commercial banks operating within the state. Also included are the assets and loans of these banks.

The next section is concerned primarily with prices and interest rates. Few reliable data series exist which are concerned specifically with prices and interest rates for South Dakota. For this reason, most of the information presented applies to the entire United States. Once again, it was believed that this nation-wide data would have some relevance to the state.

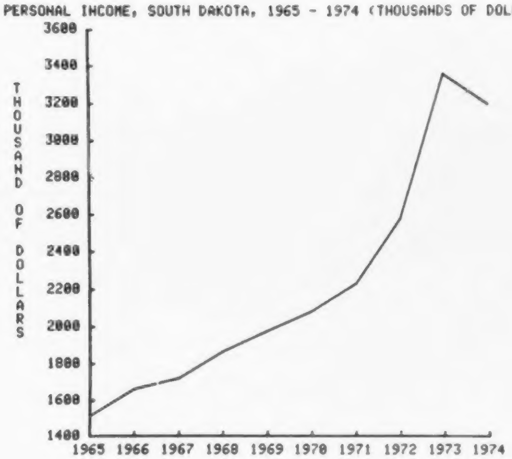
Historical trends in prices in South Dakota are available for the farm sector. Data reflecting these trends are therefore included.

CHAPTER XVI. GOVERNMENT FINANCE

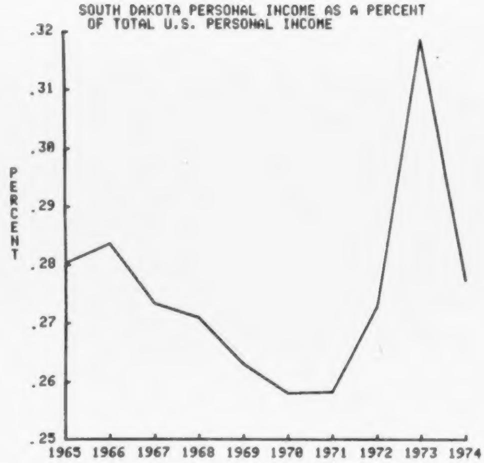
The final chapter of the Economic Section includes data relating to the revenues, expenditures, indebtedness, cash and security holdings, and tax base for governments operating within the state. State government data are presented first. Most of this information is based on fiscal year data (i.e. years beginning on July 1 of one calendar year and ending on June 30 of the following calendar year). Finally, selected data are presented for county governmental units.

Much of the information presented in this chapter was based upon data found in State Government Finances published by the Bureau of the Census, U.S. Department of Commerce. Considerable care should be taken when interpreting the data from this source. Revenues, for example, include all money collected by the State Government and its agencies and authorities. Thus, such items as tuitions, employee contributions to retirement funds, interest earnings, and so on are considered as revenue items. Similarly, expenditures include all disbursements by the State Government and its agencies and authorities, whether the money for these disbursements was originally collected in the form of taxes, intergovernmental revenues, charges and miscellaneous general revenue, or insurance trust revenues. It should also be noted that State Government indebtedness, as reported on page 271, refers to the debt of state sanctioned bonding authorities which issue revenue bonds. Such debt does not constitute full faith and credit or general obligation bonding on the part of the State of South Dakota. The State of South Dakota has no general obligation debt outstanding.

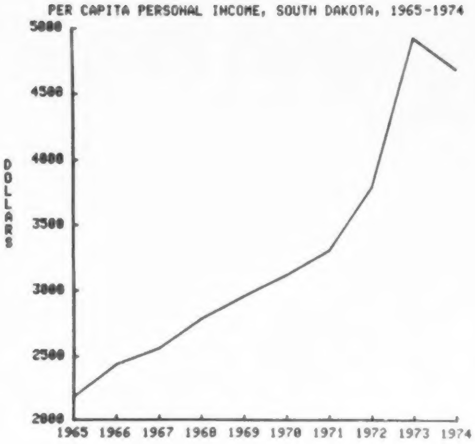
XII. INCOME



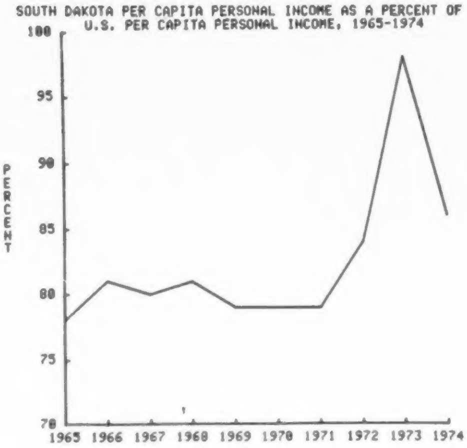
PERSONAL INCOME, SOUTH DAKOTA, 1965 - 1974 (THOUSANDS OF DOLLARS)



SOUTH DAKOTA PERSONAL INCOME AS A PERCENT OF TOTAL U.S. PERSONAL INCOME



PER CAPITA PERSONAL INCOME, SOUTH DAKOTA, 1965-1974



SOUTH DAKOTA PER CAPITA PERSONAL INCOME AS A PERCENT OF U.S. PER CAPITA PERSONAL INCOME, 1965-1974

PERSONAL INCOME BY PLACE OF RESIDENCE, 1929-1974

(THOUSANDS OF DOLLARS)

1 Output refers to gross domestic product originating in the sector in 1972 dollars.

2 Hours of all persons in private industry engaged in production, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.

3 Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

4 Current dollar gross domestic product divided by constant dollar gross domestic product.

1/ For crops, season average prices are computed by weighting mid-month prices by estimated monthly marketings. The season average prices for corn, wheat, rye, oats, barley, sorghum grain, flaxseed and soybeans include an allowance for unredeemed loans and purchase agreement deliveries valued at the average loan rate. The months included in the crop season for individual crops are differentiated by short horizontal lines in the section of the table showing monthly prices. For example the crop marketing season for corn is from October 1 through September 30. 3/ Revised. 4/ Preliminary.

[1] Rate on new issues within period. First issued in December 1929.

[2] Selected note and bond issues.

[3] First issued in 1941. Series includes bonds which are neither due nor callable before a given number of years as follows April 1953 to date, 10 years, April 1952-March 1953, 12 years, November 1941-March 1952, 15 years.

[4] Average effective rate for the year; opening and closing rate for the month.

[5] Based on seven-day averages of daily effective rates for weeks ending Wednesday. Since July 19, 1975, the daily effective rate is an average of the rates on a given day weighted by the volume of transactions at these rates. Prior to that date, the daily effective rate was the rate considered most representative of the day's transactions, usually the one at which most transactions occurred.

[6] Data for first of the month, based on the maximum permissible interest rate (9 percent beginning September 2, 1975). Through July 1961, computed on 25-year mortgates paid in 12 years and thereafter, 30-year mortgates paid in 15 years.

[7] From October 30, 1942, to April 24, 1946, a preferential rate of 0.50 percent was in effect for advances secured by Government securities maturing in 1 year or less.

[8] Series revised. Not strictly comparable with earlier data.

1/ THE TERMS REVENUE AND EXPENDITURE REFER TO ALL MONEY COLLECTED AND DISBURSED BY THE STATE GOVERNMENT AND ITS AGENCIES AND AUTHORITIES. FOR EXAMPLE, UNIVERSITY TIUTION FEES ARE INCLUDED AS REVENUE TO THE STATE, AND WHEN THIS MONEY IS SPENT IT IS INCLUDED IN THE EXPENDITURE CATEGORY.
SEE PAGE 145 FOR A MORE COMPLETE EXPLANATION.

2/ THE TERM GENERAL REVENUE IS NOT TO BE CONFUSED WITH THE STATE'S GENERAL FUND. GENERAL REVENUE AS IT IS USED HERE REPRESENTS REVENUES FROM ALL SOURCES INCLUDING INTERGOVERNMENTAL REVENUES, ALL TAXES, CHARGES AND MISCELLANEOUS GENERAL REVENUE, AND INSURANCE TRUST FUND REVENUE.

3/ THE GENERAL EXPENDITURES CATEGORY REPRESENTS ALL EXPENDITURES MADE BY THE STATE GOVERNMENT AND ITS AGENCIES AND AUTHORITIES, AND DOES NOT REPRESENT THE AMOUNT WHICH HAS BEEN DISBURSED FROM THE STATE'S GENERAL FUND.

AGRICULTURE

Agriculture is a mainstay of South Dakota's economy. For this reason, a wide variety of agricultural data is being presented in this book in considerable detail. The source of all the information, except where noted, is the Crop and Livestock Reporting Service (CLRS). The CLRS data was selected because it provides the most comprehensive information by county and state for almost every aspect of agriculture on a yearly basis.

There are several things to keep in mind while reviewing the information presented.

1. The data are reported by county, planning and development district, and the state. For the location of the planning and development districts refer to the planning district map in the Introduction.
2. The total farm values of all cattle are the values as of January 1 of the year reported. The total farm values of chickens and hogs are the value as of December 1 of the year reported.
3. The total farm values of all crops are equal to the total production multiplied by the market season's average price.
4. Throughout these chapters durum wheat is broken out into a separate class because of its different value and uses.
5. Since most of the tables in this domain were produced by computer, all numbers greater than seven digits are approximations.
6. In a few cases, the state totals are somewhat larger than the sum of the county values. The reason for this is that some county data are not disclosed because it is confidential information. Where there are less than three reporting units in a county for a particular data item, the figures are not disclosed. Where there are two or more counties with withheld information, however, the withheld data is included in state totals, leading to an apparent discrepancy. Consequently, the state total may represent all operations and the county and district totals only represent those operations whose reporting is permitted by disclosure rules. A value of zero is given to all the categories within the county where the disclosure problem exists.

The following chapters attempt to present data on all aspects of agriculture at the different levels.

CHAPTER XVII. HISTORICAL PERSPECTIVE

This chapter was included to show the trends in agriculture in South Dakota over the past 45 years. It is interesting to note the decrease in the number of farms and the increase in average size of farms. Also of interest is the change of planting practices over time, especially for sorghum and soybeans.

CHAPTER XVIII. COUNTY COMPARISON

The purpose of this chapter is to show the relative importance of the various crops and livestock in each county and planning district. The maps and tables enable comparisons to be made both between and within counties. The maps especially show the effects of climate on planting practices and the importance of certain crops in particular areas.

CHAPTER XIX. STATE AND PLANNING DISTRICT COMPARISONS

This chapter emphasizes the relative importance of particular crops and livestock within the state and planning districts. The lineplots emphasize the increase and decrease of acres planted, production, and total value of crops and the increase and decrease of livestock number and value on a statewide basis.

CHAPTER XX. IRRIGATION

Irrigation continues to become more important to South Dakota agriculture. This chapter shows irrigation practices within the counties, focusing on the trends in irrigation since 1956. Due to the small amount of irrigation in some counties, some information is not available because of disclosure rules. Where a county has a value of zero for the year 1974 it either means there was no irrigation, no irrigation reported or it was omitted because of disclosure problems. The effects of irrigation can be understood by comparing the crop yield statistics for corn and alfalfa of Butte and Harding Counties. Considerable irrigation occurs in Butte County, but Harding County has very little irrigation.

Included in this chapter are a map and table indicating the percent of cropland irrigated in each county. By itself, this information can be misleading as to the amount of irrigation that actually occurs since the amount and percent of cropland varies between counties. Thus, also presented are tables and a map illustrating the amount of cropland in each county.
